Enterprise Managed Workspace

With a new era of office spaces, Big Box challenges the conventions of traditional work hubs. Our mission is to help companies by creating an environment where they can prosper.

Our sole aim is to create a network of inspirational work hubs across India and improve the quality of the work-life of our customers.

What we bring to the table

We are outsourced office partner of choice for enterprises from across the world. Its industry-leading, Grade A, 100% compliant offices are custom designed for teams of all sizes and provide an inspiring, amenity-rich work environment.

By choosing a Bigbox office, organisations gain the advantage of agility allowing them to adapt to an evolving world. A team of Bigbox experts take charge of the property during its discovery, that leads to space planning, followed by 360° facility management.

These offices are professional ecosystems designed to optimise efficiency, thus, aiding the workforce in achieving organisational goals. Medium to large enterprises commission customised offices that align with their brand's ethos, while offering flexibility in contracts and ability to scale with ease, gaining both financial viability and convenience.

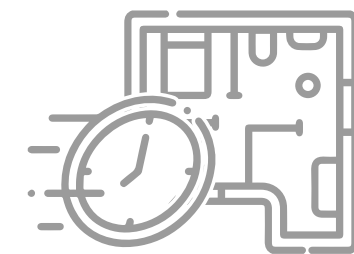

Our Proposition For You

Our customized solutions deliver an office environment that suits business needs, allowing enterprises to focus on growth!

Built-to-Suit Design Spaces

Developing custom designed grade A offices that strategically meet each organisation's requirements

60-90 Day Project Delivery

Handing over offices within 90-day, right from signoff to delivery. A record time to start functioning in full capacity.

Branded For You

Building offices that echo each organisation's unique identity, functionality and ethos

360° Facility Management

Executing end-to-end administration and upkeep of the office complemented with high performing tech solutions

Secure Offices

Assuring maximum peace of mind with 24x7 private access control and manned security services.

Futuristic Workplaces

What It Is?

A holistic strategy that employs digital technology to reimagine the employee experience and redesigns organisations to be agile, resulting in a more productive and adaptable workforce.

Why It Matters

People want fresh approaches to work. These new patterns necessitate new organisational tactics.

Where It's Going

Leading companies are redefining what work is, shifting their workforce to produce new kinds of value, and expanding "new skilling".

Project Roadmap

Ideation

Our team develops pioneering & sustainable ideas according to the wants and requirements of your business.

Drafting

Our team will provide you with a 2D/3D of the finalised layout to give you an accurate representation. Enhancement of the layout would occur after visualisation and would be developed during the discussions.

Discussion

Our journey begins with a productive meeting where we get to know you, your people & develop a design accordingly.

Planning

We will develop a plan, designing in the ideas that we have curated to compose your interiors.

Finalisation

Once the designs are confirmed, our team can start with arrangements to get the fit out works underway!

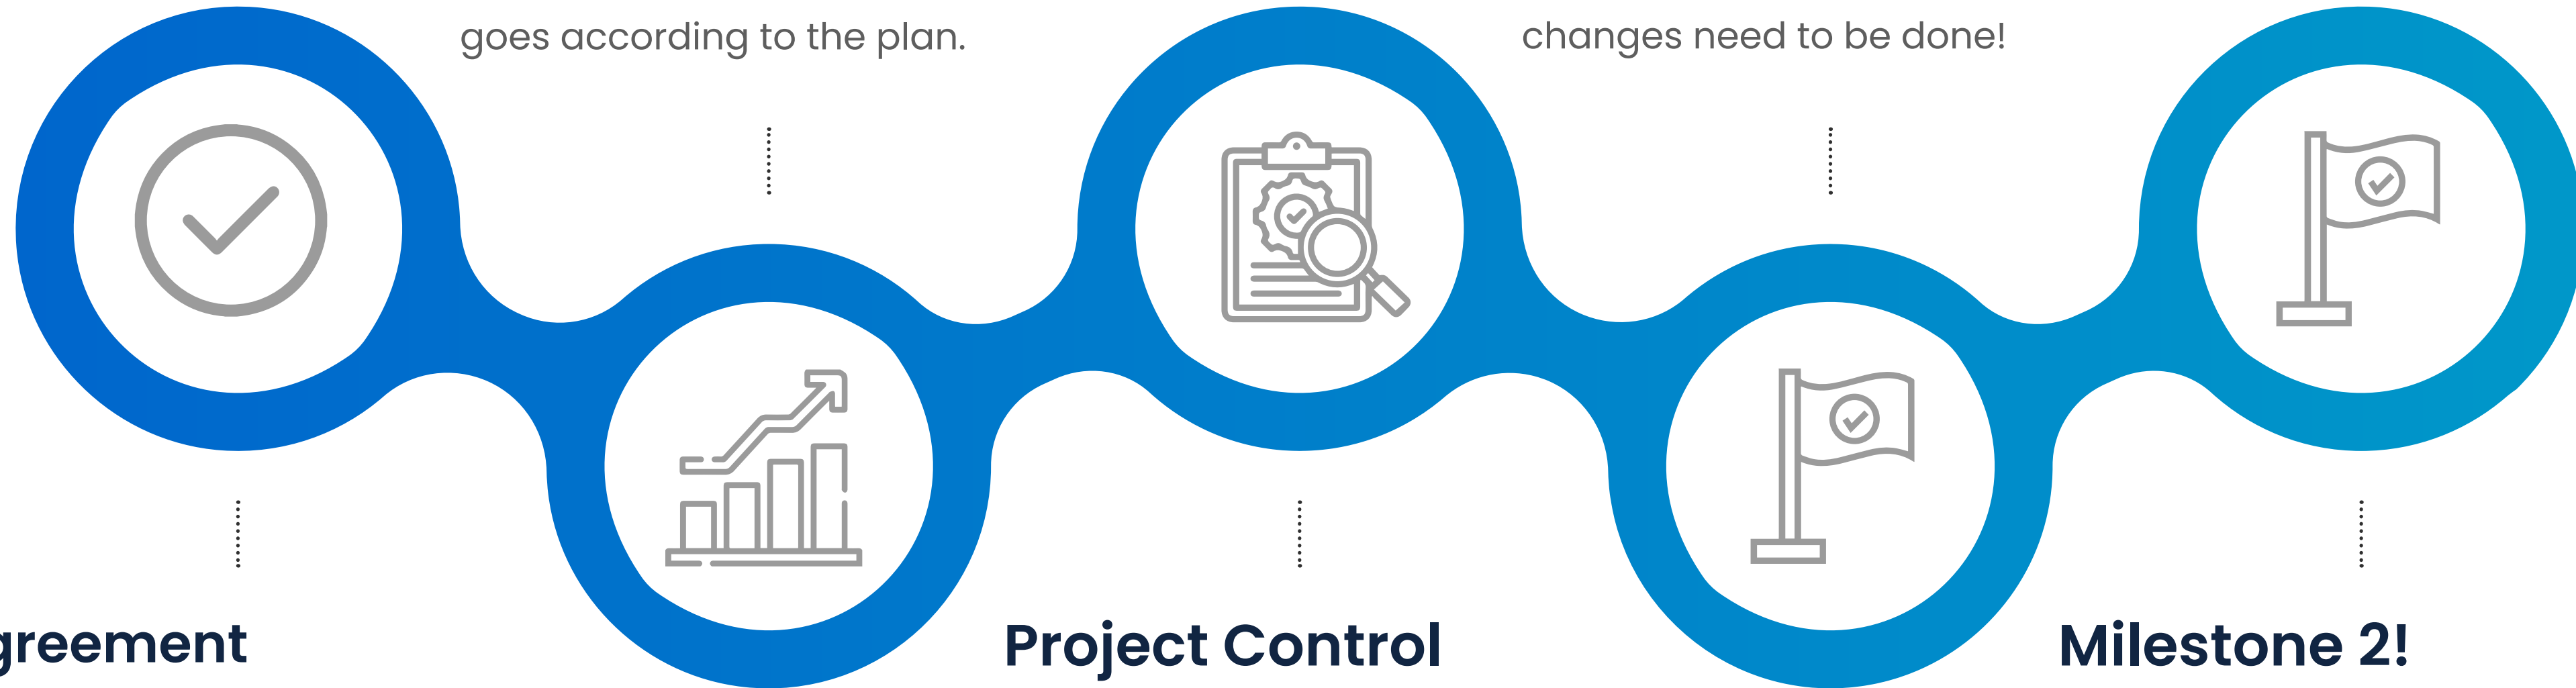

Project Roadmap

Development

Our team will update you with the operations timeline and ensure all goes according to the plan.

Milestone 1

The final stage where we see our design come to life and check if any final changes need to be done!

Agreement

Release of services design & BOQs,
Signing LOI & Agreement, Marking &
Execution

Project Control

Project Monitoring & Mitigation,
Weekly progress & update
Procurement closure

Milestone 2!

Project Completion & Handover!

Design Priorities

“Design creates culture. Culture shapes value. Values determine the future.”
– Robert L. Peters

RIGHT DESIGN

With the right design, you'll tend to people's needs and help your team thrive.

PRODUCTIVITY

Level up your team's productivity by improving their work environment.

PURPOSE

The less time you spend thinking about your work environment is more time spent on working and feeling fulfilled

OPTIMISED SPACE

It's about creating a workplace that maximises productivity through innovative design techniques.
